

ABSTRACT

A broadhead for use with an arrow, includes a one piece body having a penetrating end, a shank formed integral therewith and depending from the penetrating end and an arrow engaging  
5 end formed integral therewith and depending from the shank, a continuous circumferential blade retaining lip being defined on the one piece body. And, a plurality of replaceable main blades, each of the plurality of main blades having a leading edge and a trailing edge, a retaining edge being defined proximate the leading edge, the retaining edge of each of the plurality of blades being retainingly disposed in the continuous circumferential blade retaining lip when each of the  
10 main blades is operably coupled to the one piece body. A method of forming such a broadhead is further included.
